PRATEEK GUPTA

Lead Chaos and Performance Engineer

+91 999 930 9300 | prateekgupta1089@gmail.com | www.linkedin.com/in/prateekgupta10/ | Delhi, India

PROFESSIONAL SUMMARY

I am a seasoned engineer with over 13 years of experience in enhancing system performance and reliability for global clients. I lead non-functional engineering initiatives, including performance optimisation and chaos engineering, to improve efficiency and reduce costs. I have a proven track record in managing complex engineering projects and integrating innovative technologies to drive significant results.

CORE COMPETENCIES

Organizational Leadership and Vision: Proven ability to define and execute performance and chaos engineering strategy across globally distributed teams. Led initiatives that improved system scalability and resilience, aligning engineering outcomes with business goals

AI and LLM Performance Strategy: Led performance engineering efforts for AI-driven systems, including Large Language Models (LLMs). Designed end-to-end frameworks to validate inference latency, responsiveness, and throughput, directly improving user experience under scale

Technical Mentorship and Talent Development: Mentor and develop junior and mid-level engineers, fostering a high-performance culture grounded in deep technical expertise, collaboration, and continuous learning

Executive Stakeholder Alignment: Advised VP Engineering and product leadership on performance KPIs, architectural trade-offs, and capacity risks. Presented strategic insights to C-level stakeholders, influencing roadmap prioritization and release cycles

Strategic Planning and Delivery Excellence: Directed initiative-level planning, SoW development, and resource forecasting for large-scale engineering programs. Delivered complex outcomes ahead of schedule through agile orchestration and execution oversight

Cross-Functional Collaboration and Influence: Established performance engineering as a first-class concern across product, SRE, QA, and Dev teams. Influenced design and deployment practices through data-driven insights and early engagement

System Resilience and Chaos Engineering: Pioneered chaos engineering practices to proactively uncover system vulnerabilities and improve production resilience. Integrated fault injection workflows into CI/CD, improving recovery metrics and production readiness

Cloud-Native Performance Optimization: Spearheaded performance tuning across Azure, AWS, GCP, and containerized platforms (Kubernetes, Red Hat OCP, Nomad). Reduced cloud resource waste by 25% through continuous monitoring and adaptive load testing

Advanced Monitoring and Observability: Deep expertise in real-time monitoring, profiling, heap/thread dump analysis, and root cause investigation using tools like Dynatrace, AppDynamics, Prometheus, and Grafana

Technical Communication and Insights: Deliver executive-ready performance reports, translating technical findings into clear, actionable insights for both technical and non-technical stakeholders

Agile Engineering Leadership and Scaled Delivery Governance: Led the adoption of agile delivery frameworks across globally distributed teams to embed performance and resilience engineering into the development lifecycle. Spearheaded the integration of load testing, chaos experiments, and non-functional requirements within sprint planning and release workflows, enhancing test reliability, and production stability across multiple product lines

Client Engagement and Business Alignment: Engaged with clients and cross-geo teams across industries such as finance, travel, manufacturing, and healthcare to align engineering efforts with SLAs and operational KPIs.

CI/CD Integration and Automation: Integrated LoadRunner, JMeter, Locust, and chaos experiments into Jenkins/GitLab pipelines. Developed Grafana dashboards to monitor real-time performance and system health

Tool Evaluation and Process Innovation: Led the evaluation and adoption of cutting-edge performance and monitoring tools, improving system observability and test efficiency across the delivery pipeline

TECHNICAL SKILLS

Performance Testing Tools	LoadRunner, Apache JMeter, Neoload, Locust, BlazeMeter
Performance Testing Protocols	Web (HTTP/HTTPS), TruClient, REST APIs, SOAP, Web Services, SAP Web, Microservices, Seibel, Mobile, .NET
Chaos Engineering Tools	Chaos Toolkit, Custom Python Libraries/Code
Application Performance and System Monitoring	AppDynamics, Dynatrace, New Relic, Splunk, Kibana, Prometheus, Grafana, Wily Introscope, PerfMon, VMware vSphere, Linux Utilities
Debugging and Profiling	Dynatrace (Hotspots and PurePath), Heap Dump, Thread Dump, JProfiler, VisualVM, SQL Profiler, ANTS Profiler, Fiddler, WireShark
Cloud and Containerization	GCP, AWS, Azure, HashiCorp Nomad, Kubernetes, Red Hat OCP
Project Management and CI/CD Tools	JIRA, Confluence, SharePoint, Jenkins, Gitlab
Programming Languages and Scripting	C/C++, Java, Python, Shell, Javascript
Databases, Data warehouses and OS	Oracle, MySQL, PostgreSQL, Couchbase, SAP HANA, BigQuery, Windows, UNIX, LINUX

EXPERIENCE

Lead Chaos and Performance Engineer
Behavox
05/2023 – Present Remote, India

- Facilitated Scrum ceremonies (stand-ups, sprint planning, retros) across distributed engineering squads
- Identifying performance, chaos, and other non-functional requirements to align testing with business objectives
- Design & conduct comprehensive performance tests & controlled chaos experiments, revealing critical system vulnerabilities
- Led cross-functional teams in design & implement comprehensive performance testing strategies for enterprise applications
- Created a Python framework to conduct end-to-end (E2E) performance testing of the AI and LLM applications
- Created test scripts and executed performance tests to validate LLMs, ensuring product scalability and efficiency
- Oversee chaos experiments in controlled settings to evaluate system behavior, pinpoint vulnerabilities, and assess resilience
- Monitor real-time data during tests to analyze system responses and ensure robust performance metrics
- Implement automated chaos experiments within CI/CD pipelines, enhancing testing efficiency and system reliability
- Delivered detailed technical reports and presentations to stakeholders, translating complex data into actionable insights

Lead Performance Engineer
Amdocs
07/2021 – 05/2023 Remote, India

- Collect and analyze performance and other non-functional requirements to ensure comprehensive test coverage
- Craft a detailed performance test plan and workload model to simulate real-world usage and load scenarios
- Develop and assess performance test scripts for adherence to functional specifications and scripting standards
- Generate and refine test strategy documents to align testing activities with project goals
- Evaluate the technical components of applications to assess performance capabilities
- Conduct performance tests to identify and address potential bottlenecks and issues, enhancing system efficiency
- Deliver comprehensive performance summaries to stakeholders, providing actionable insights and recommendations

Lead Performance Engineer
Infosys Limited
07/2018 – 07/2021 Pune, India

- Conducted detailed performance analysis, including load, stress, and endurance testing, to identify system bottlenecks
- Mentored junior engineers, fostering a collaborative team environment focused on continuous learning & development
- Directed performance testing activities, ensuring adherence to timelines and quality standards
- Coordinated with managers, stakeholders, & clients to ensure testing activities were aligned with business objectives & timelines

Senior Performance Engineer
Larsen & Toubro Infotech Limited
04/2017 – 07/2018 Pune, India

Performance Test Engineer
IGT Solutions
09/2015 – 03/2017 Gurgaon, India

Performance Test Engineer
Allscripts
11/2014 – 09/2015 Pune, India

Performance Test Engineer
Syntel
01/2012 – 10/2014 Pune, India

CERTIFICATION

Certified ScrumMaster®
Scrum Alliance Issued Feb 2025

Neotys Certified Professional for Neoload
Neotys Issued Jul 2019

Splunk Certified User 6.x
Splunk Issued Sep 2017

Microsoft Certified Azure Fundamentals
Microsoft Issued Oct 2019

New Relic Certified Performance Pro
New Relic Issued Jun 2019

EDUCATION

Bachelor of Technology in Computer Engineering
LIET, Rajasthan Technical University
08/2007 – 07/2011 Rajasthan, India
